November 2007

**Pachmayr's Decelerator<sup>®</sup> Recoil Reduction Technology is now available for the popular T/C<sup>®</sup> Encore and Pro Hunter.**

Pachmayr - a Lyman brand - has introduced the new Decelerator Grip & Forend Set for the popular T/C Encore and Pro Hunter Handguns. Using the the proven Decelerator<sup>®</sup> material, Pachmayr has crafted a grip and forend that promise far greater control while softening recoil. In addition to recoil control, the Decelerator material offers a secure, consistent grip that can actually enhance accuracy, especially at the range when firing multiple shots. The softer forend can provide a secure, steady rest on any handy surface in the field. Individual grips or forends are also available separately.

The Decelerator technology employed in the set's grip combines the proven Pachmayr rubber material with special recoil damping, deformable inner chambers. A secure, slip-free grip in any weather condition is also an important benefit of the proven Decelerator material. In addition, both the grip and forend feature a removable sling swivel stud. Whether for locking on a steadying bipod shooting rest or just attaching a sling for convenient carrying, these studs are a real benefit.

Pachmayr's New Decelerator Grip & Forend Set for the T/C Encore makes the handgun look even better than the day it left the factory. The set, as well as all Lyman products and brands, are available nationally through gunsmiths, firearms and sporting goods retailers and mail order companies. Pachmayr, TacStar, Trius Traps, Butch's Gun Care, TargDots and A-Zoom Precision Snap Caps are all Lyman Brands.
